PAYS TRIBUTE TO JOSEPH A. CORAM

President White of Bingham Con. Tells What Coram Has Done.

MADE POSSIBLE THE DAVIS-DALY COMPANY

Accomplished What Many Others Had Attempted to Do Without Avail.

President E. L. White of the Bingham Consolidated Mining company is a visitor to the various interests in Utah of the company of which he is the official head. President White arrived from Butte Monday evening, after spending some time in looking over the properties of the Davis-Daly Es-tates company. Mr. White and numerous other eastern mining men of importance are interested in this late Butte organization, and in speaking about the property on Tuesday, President White paid a deserved tribute to the genius and ability of J. A. Co-

All Efforts Had Failed.

To Mr. Coram is due the credit for bringing order out of the fifteen years or more of litigation over the great group of mines included within the ownership of the Davis-Daly company. For this number of years Mr. Coram has been interested in the property. Numerous attempts have been made to consolidate the claims within one consolidate the claims within one group, but each time when success seemed about to crown the efforts, some vital prop was knocked from under and the structure fell. Mr. Coram, how-ever, finally succeeded in satisfying all the heirs interested, he bought up all the law suits of years standing, and made possible the formation of the company which is destined to exert such a beneficent effect upon the mining life of Butta.

Own Magnificent Group.

It is doubtful if any other one man-could have executed this coup, and to Mr. Coram is given the credit by his associates. The Davis-Daly Estates company possesses a magnificent property, one peculiar item being the fact that the group is located right in the heart of the city of Butte. The courthouse, postoffice and many of the prom-inent buildings of the city cover portions of the ground where operations soon will be on in full blast. Surrounding the group are the properties of the Amalgamated people.

Making Inspection Visit.

There has been no difficulty experienced by the company in placing what stock they have cared to place upon the market, and the miners of Butte, states Mr. White, are placing their small or large savings in this company, President White states that the present visit to Utah is merely one of many that he makes each year. While here during the rest of the week he will visit the properties of the company, having started his tour of inspection by visiting the smelter of the company Tuesday morning.

WHAT ARE THOMPSON PLANS?

Mining Fraternity Greatly Interested in Future of This Property.

Perhaps there are few properties right now occupying a more prominent position in the minds of the mining fraternity than the Thompson, the sole inquiry being whether the company will or will not soon be numbered among the active list. Reports have varied in their substance regarding this property, and the question has been another. ty, and the question has been anwered both ways.

All are agreed that the Thompson is

worth the trial, confidence being ex-pressed in the mine on account of the prominence of its neighbors. Word that this company is clarated to the remain of the remains the r this company is planning to get to work will be most welcome. One thing has resulted from the recent activity in Thompson stock, and that is liberal profits for the one who got in early, and for the broker who handled the buying and selling for the public.

CON. MERCUR ANNUAL.

Same Board of Directors Returned by

Stockholders at Jersey City.

At the annual meeting of the stock holders of the Consolidated M Mining company, held in Jersey last Monday, the same board of direct last Monday, the same board of directors who served so capably during the last fiscal year were re-elected. This board is composed of the following members: John Dern, J. G. Dern, J. E. Fricke, E. H. Alris, Hubbard W. Reed, all of Salt Lake; A. W. Chesterton of Boston and H. A. Bingham of New Jersey.

As is the usual custom of this company, Secretary Reeves will mail the annual report of the company to the stockholders as soon as the same has been compiled.

LULU GROUP SCENE OF GREAT RESULTS

Beaver County Mine Showing Finest Body of Mineral Ever Encountered.

Beaver county comes to the front with its usual faithfulness for inserting a bit of the bright and cheerful into the dull summer season, by a strike of the utmost importance on the propcrty of the Lulu company. Word has been received from the superintendent of the mine that a larger body of ore, containing greater values than any ever encountered upon this prominent propcrty, has been found.

High Silver-Lead Values.

The management has been drifting for some time on the strike of the vein, being in a distance of about 500 feet at the present time. It was at this point that the new body was struck, and the superintendent states that the ore carries very large values in the carbonates of lead and silver. There is no doubt of the fact that the Luiu company is driving along the Horn Silver vein, and the indications all are to the effect that this company is fast approaching a condition fully justified and anticipated by the proximity to its profit-sharing neigh-

DAY ON 'CHANGE.

Half-Day Session Is Productive of Large Sales on Tuesday.

Although onl yhalf a day could be spared from the Fourth of July festivities for the transaction of business on the local exchange, there was a liberal amount of trading done before the hammer fell before noon. With but two exceptions, all the business done was during the open board session, and trading was brisk.

Columbus Consolidated, Thompson, May Day, New York and Beck Tunnel came in for a liberal share of attention, prices showing without any marked exception greater strength than during the previous day. New York is beginning to show considerable staren in price, and it is thought that there is much Park City buying of this stock.

During the session a total of 38,425 shares were sold, representing a market value of \$25,338.75. The quotations for the day closed as follows:

UTAH MINES LOOK GOOD TO CHICAGO

Improving Conditions Are Watched Closely by the Investor in East.

FUNDS COME READILY TO DEVELOP GROUND

Charles D. Rooklidge Returns From Conference With His Illinois Associates.

While it is natural for Utah citizens to be proud and assertive of the virtues of Utah mining properties, it is more becoming to modesty to have the praise come from outside sources. That the fair fame of Utah mines is becoming more appreciated as the efforts of the various companies disclose more favorable conditions continually is ap-parent from the experiences of all who return from other centers. Charles D. return from other centers. Charles D. Rooklidge, manager of the Ploneer Ore Sampling company, and extensively interested in Yerington properties, who returned Tuesday from Chicago, can testify as to the increasing faith of Windy City investors in Utah propositions.

Chicago Buying In.

Mr. Rooklidge states that Chicago is becoming heavily interested in Utah and Nevada, and that the present is a most favorable time to increase this interest, and with the return of scores of the investing population now on va-cations at summer resorts, Chicago capital will be searching more diligent-ly for Western legitimate investmens, Chicago is the home of several capitalists who have become part owners in the Wheeler and Yerington companies which recently were organized by Mr. Rooklidge and his associates.

Awaiting Engineers' Report.

A conference was had between these gentlemen, and as a result there is a thorough understanding regarding the campaign of improvement and development of the properties involved. Mr. Rooklidge states that he is expecting daily the reports of the engineers who have finished their work of surveying the claims, establishing roadways, pipe lines and the site for the company's new mill in and around the Wheeler group.

Let Contract for Mill. The Wheeler company, upon receipt of these reports, will let the contracts for the equipment of the mill without delay, and the machinery will be placed upon the ground immediately. In the meantime the management is rushing exploratory work upon the property along lines with which all interested are

ANNUAL OF GOLD BAR.

Interesting Facts Disclosed in Report of Manager J. R. Davis.

At the annual meeting of the Bullfrog Gold Bar company, recently held in Nevada, the report of Manager Davis showed that in the way of drifts, shafts and crosscuts, there were 2,355 feet of development work done during the year that had just closed. Up to the present time the lowest level reach ed by the management is 300 feet.

enormous and richly producing ledge that has established the property in the estimation of the public has been crosscut at the 150-foot level, partially crosscut at the 250-foot level. The to-tal crosscutting on this ledge amounted to 375 feet, and 560 feet have been drift-ed on the same, which work has opened up ore bodies showing an actual value of \$2,347,400. During the year the company spent

the sum of \$41,861.97 in doing the de-velopment work, while a splendid equipment was purchased and installed at a great expense. The company has cash balance on hand of \$28,893.20.

COKE PLANT PURCHASED.

Large Output Will Result From Consummation of Big Deal.

TACOMA, Wash, July 3.—The Taco-ma Smelting company has purchased the coal mining and coke plant of the Western American company at Fair-fax, thirty-five miles from Tacoma, together with 2,000 acres of mineral and. The coke production will be increased from the present output of one hun-dred tons a day to four hundred cons a day, supplying both the California and Tacoma smelters. While the consideration is named as nominal, it is understood the property is estimated to be worth in the neighborhood of a million dellars.

FUTURE OF PROPERTY HAS BEEN ASSURED

Gold Butte Superintendent Is Pleased With Response of the Mine.

Superintendent Glbbs, under whose efficient management the property of the Gold Butte Mining company has assumed a decided and most pleasing phase from a mining standpoint, is in phase from a mining standpoint, is in the city for the purpose of taking a long-desired vacation from his active duties. The Gold Butte property has gone by leaps and bounds from the prospect stage to a solid mining propo-sition, and Mr. Gibbs has every rea-son to feel gratified at the results of his efforts and at the stockholders' ap-preciation of his work.

Question to Be Decided.

Mr. Gibbs stated Tuesday that there was now only one question left for the company to determine regarding the mine, and that was the definite quality of their ore, or, in other words. whether the company possesses a shipping or a milling proposition. It is thought likely that the Gold Butte wilf be classed ultimately in the latter cate-gory, although those interested refrain from forming any opinion until greater depth has been attained upon their

Large Tonnage Mill Ore.

One thing is positive, however, and that is an enormous tonnage of milling grade of ore is being placed in a tangible shape by the management, and to this effect Mr. Gibbs has no hesitancy in expressing his opinion. This com-pany, which is composed largely of Sait Lake investors, is confining its efforts to driving the long tunnel for the purpose of exploring the numerous fissures at great depth. A distance of 185 feat has already been obtained, and 150 feet further on is the main fissure whose disclosures will determine largely the immediate future of the property

Developments Pleasing.

Mr. Gibbs states that the tunnel is now driving through a very fine min-eralized formation, and the developments on the Nevada fissure, recently encountered, were so far in excess of the fondest anticipations of the com-pany that more telling results are con-fidently expected as progress is made in this work. Even shallow depth has shown the ability of the property to give great increases both in volume and extent, and the Salt Lakers inter-ested are greatly pleased with the developments on their ground.

HOME FOR THE FOURTH.

Utah Properties Close Down to Celebrate Independence Day.

The inclination of the employees of the various mining companies of the State to assert their prerogatives as American citizens has resulted as usual in nearly all the big properties of the State closing down for the purpose of lowing the men to celebrate upon the mine-owner as upon the man who drills his way into fortunes for others.

As a consequence, the city is becom-ing crowded with miners, each train brings them in, and officials from the brings them in, and officials from the surrounding camps also are arriving to spend the next two days free from thoughts of mine and dump. There are very few properties in operation today, the only busy man being the one upon whose shoulders rests the continued fitness of the machinery.

NEVADA SUPERIOR SHIPMENTS. Car En Route and Company Seeking More Teams at the Mine.

The Nevada Superior company has snother car of rich ore en route from the mine, and at the local offices of this company it was stated that the ship-ment is looked for at any time. The Nevada Superior company would be a much more liberal contributor to the local market were the transportation facilities more favorable. The management is making every endeavor to secure additional teams to haul their ore, and when this is done the company may be looked to for faithfulness in placing their ores in the local market

FLAGSTAFF MAKES PAYMENT.

Company Also Filed Copy of Articles of Incorporation Tuesday.

In addition on Tuesday to paying the sum of \$15,000 to the Alta Consolidated company on the bond, the Consolidated Flagstaff company filed in the office of the Secretary of State a copy of the articles of incorporation of the com-pany. The capital stock of this com-pany is \$2,000,000, and the following compose the official family: T. J. Prin-gle, president: Paul D. Durant, secre-tary, W. H. King is named as the res-ident agent for the company. dent agent for the company.

SECRET COMPANY PURCHASE.

Cole Lode Claim Added to Territory of Alta Organization.

The Secret Mining and Milling company, owning and operating properties in Alta, has acquired by purchase the Cole claim, which adjoins the company's possessions on the south. This acquisition by the Secret company is generally considered a fortunate one, as the Colo claim contains several mag-nificent showings of mineral. This claim makes five altogether now owned Chamberlain's Colie, Cholera and
